OneView Mobile
Get More Done on the Go

When you are balancing care for many patients across multiple centers and hospitals, you need an app like **OneView Mobile**. It gives you access to robust patient data whenever you need it, wherever you are.
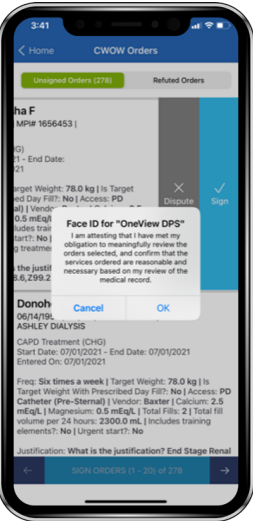

OneView Mobile allows you to:

- Use biometrics like Touch/Face ID for order review
- See patients who are treating at each facility, prioritized by time left on dialysis
- Quickly access comments for patient care categories and treatment details
- Complete COVID-19 vaccine and flu shot attestations on iOS; and complete flu shot attestations on Android
- Receive optional push notifications for time-sensitive tasks

Features coming soon:

- MD role in new patient admissions
- COVID-19 vaccine attestations for Android
- COVID-19 vaccine booster shot attestations for both iOS and Android

OneView Mobile features:

Touch/Face ID capabilities

- Save time by signing in with biometrics like Touch/Face ID to avoid re-entering your login credentials
- Use Touch/Face ID for order review

View patient schedules

- See all of your patients who are treating at each facility, prioritized by a patient's time left on dialysis
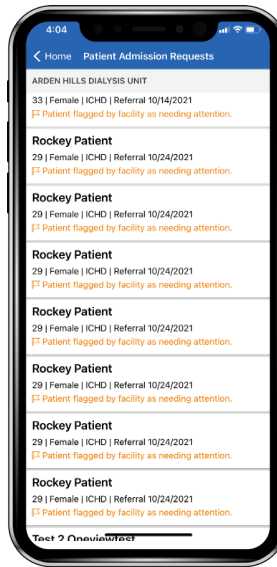

DaVita. | Physician Solutions
One View

OneView Mobile features, continued:

### COVID-19 vaccine and flu shot attestation forms

- Complete your COVID-19 and flu shot attestation forms on OneView

New patient admissions—coming soon!

- Streamlines the Medical Director's ability to view medical records and accept or deny new patient admission requests
- Includes optional push notifications to help alert MDs to review urgent requests as soon as they are available

Optional push notifications

- Receive optional reminders to complete time-sensitive tasks
- Optional OneView Push Notifications are automatically set to 'on.' They can be adjusted in the Settings menu

Get started with one click:

To access, search for "OneView DPS" in the Apple Store (iOS) or the Google Play Store (Android).
Note: Mobile access is limited to read-only. Documentation features not available on mobile.

Download the iPhone app
